CELEBRATING

50 yrs

1974 - 2024

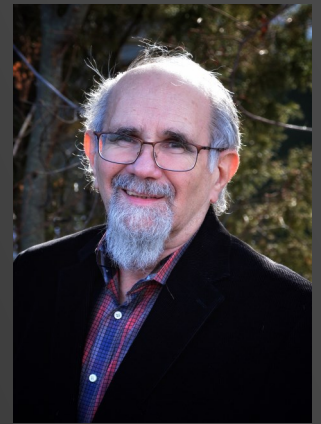

CLINICAL SCIENCE
LABORATORY

From Humble Beginnings...

1974... We got our start in Sharon, Massachusetts where Dr. Stanley Elfbaum and Dr. Lou Amoruso converted an old farmhouse and barn into a laboratory. With much hard work, and perseverance, the new laboratory was a success. Eventually, it was clear that a larger facility was in Clinical Science's future. In 1983, Stan and Lou bought a piece of property in Mansfield, MA and designed a state of the art testing facility that would be able to accommodate the rapid growth the new company had experienced.

Dr. Stanley Elfbaum, PhD., D.A.B.C.C.

Dr. Louis Amoruso, PhD.

Today, 50 years lat-

2024... Dr. Elfbaum and Dr. Amoruso continue to direct Clinical Science Laboratory. Their vision has turned into a well-known international medical laboratory known for accurate results, quick turnaround times, and great client support. Today, Clinical Science Laboratory tests over 7,000 samples a day, employs more than 80 staff members and operates three shifts per day, seven days a week. We take great pride in our professional reputation earned over the past 50 years thanks to our loyal clients. Setting us apart in the industry is the quality of testing services offered, our dedicated staff, and the desire to assist healthcare providers care for their patients. "Personalized Service with Professional Commitment since 1974" - That is our promise and guarantee.

Checking all the boxes!

- ◆ Toxicology screens urine / saliva
- ◆ Confirmatory LC/MS testing
- ◆ Hematology
- ◆ Chemistry
- ◆ Microbiology
- ◆ Maternal Health
- ◆ Potency/Industry Guidelines
- ◆ Meconium

CSL

WEBINARS

- ◆ An opportunity to meet with our technical Director, Dr. Lou Amoruso, and learn all about the testing we do here in the lab
- ◆ Each in-service is focused on your facility's specific needs and concerns
- ◆ Opportunities for staff to ask questions about any aspect of drug testing
- ◆ Learn about cutoff values and how to interpret them
- ◆ Hear about the newest trends in drugs of abuse
- ◆ Learn which method of drug testing is the best choice for your facility.

The National AATOD conference is a much anticipated event we look forward to every 18 months. It is a great opportunity to collaborate with other professionals, catch up with clients, and meet new faces. This year was especially exciting because we had to opportunity to visit Las Vegas!

Cutting Edge Technology Saving Lives!

Protect against a life-threatening pregnancy complication

PREECLAMPSIA TESTING

CLINICAL SCIENCE LABORATORY

Clinical Science Laboratory is proud to be the only lab in New England offering the first and only FDA-cleared blood test for risk assessment and management of severe preeclampsia.

FINALLY, A NEW WAY TO PREDICT A LIFE-THREATENING PREGNANCY COMPLICATION

What is Preeclampsia?

Preeclampsia is a potentially fatal blood pressure disorder that occurs during pregnancy and the postpartum period. Preeclampsia is a condition unique to pregnancy that affects a small percentage of all pregnancies and is a significant cause of maternal and neonatal morbidity and mortality.

What is so significant about this new test for Preeclampsia?

This groundbreaking new test has been recognized as one of TIME Magazine's™ Best Inventions of 2023. The revolutionary test measures two angiogenic biomarkers, serum soluble fms-like tyrosine kinase 1 (sFlt-1) and placental growth factor (PlGF), which are associated with preeclampsia. With this new test, healthcare providers can now get early and objective information for better management of preeclampsia.

Who is Clinical Science Laboratory?

Clinical Science Laboratory has been providing comprehensive testing services to the medical community since 1974. With specialties in toxicology, hematology, and chemistry testing, CSL processes over 10,000 samples every day. Clinical Science Laboratory holds federal licensing by CLIA (Clinical Laboratory Improvement Amendments of 1988) and certification by CAP (College of American Pathologists) to ensure that the highest quality standards are met.

Why is CSL offering this test?

At Clinical Science Laboratory, we carefully implement new tests that are based on the most advanced technology, and the positive impact they will have on members of our community. We are proud to be the only New England based medical laboratory with the capabilities, credentials and reputation to offer the newest method of preeclampsia testing. Our focus and top priority, for 50 years and counting, is assisting medical professionals with diagnostic tests that help promote a healthy, long life.

"Because every result is important"

CLINICAL SCIENCE LABORATORY

CHIEF CANINE OFFICER

If you ever stopped by Clinical Science Laboratory, there is a good chance you were lucky enough to meet the CCO (Chief Canine Officer), Baron. Baron's workday consisted of catching up on his rest, assisting staff dispose of food they

couldn't finish, and being a great ambassador of his breed, the German Shepherd. Sadly Baron crossed the rainbow bridge early in July at the age of 12. He will be missed every day, and remembered with love.

Our CFO, Lonnie Elfbaum, is an extremely talented artist. Lonnie painted this memorial portrait of Baron from the original photograph below.

A touching tribute...

MICHAEL AMORUSO
V. P. Sales

"Michael is a dynamic leader who thrives on working with clients and exceeding their expectations. His unwavering commitment to excellence and his exceptional interpersonal skills have helped to establish Clinical Science Laboratory as a premier provider of laboratory testing services."

The Team Dedicated to **CLIENT SUCCESS**

LORI O'NEILL
Director of Marketing

"Lori has a natural ability to connect with clients and learn what matters most to them. Her warm and confident demeanor, combined with her exceptional people skills make every client feel like they're a priority."
